**King County International Airport
Boeing Field**

BFI AIRPORT ADVISORY

DATE: October 30, 2008

TO: King County International Airport Tenants
Distributed by e-mail and fax

FROM: Robert I. Burke, AAE, Airport Director

SUBJECT: **TAXIWAY BRAVO REHABILITATION PROJECT
CHANGES TO AIRPORT SECURITY FENCING**

As part of the Taxiway Bravo Rehabilitation related works, the Airport will be modifying the perimeter security fencing and gates located between the Air Traffic Control Tower and Midfield Airpark. Specifically, the security fence in this area will be moved from its present location thirty-five (35) feet to the west edge of the existing service road. **This will create an expanded airside service road moving vehicle traffic from the taxiway shoulder, as well as reducing the number of security gates, permanently removing security gates V-59 and V-60.** Midfield Airpark tenants will still be able to gain airside access from vehicle gate V-58, located at 8700 East Marginal Way South.

This work is expected to commence early next week and should be completed by Friday, November 7, 2008.

On a related matter, **all gate codes will be updated on November 6, 2008**; the new codes have been issued to tenants via the U.S. Postal Service. Airport Operations staff have contacted Midfield Airpark tenants to personally brief them of these changes.

Questions regarding this work may be directed to Airport Operations at 206-296-7334. Thank you for your cooperation and patience during this Airport improvement project.
